Projects

Responsive Website using Web development

Creating an responsive website for different devices with the effective appearance, by using the HTML,CSS along with the bootstrap framework.

Supermarket Management System using Python

Supermarket Management System is designed and developed using QTdesigner and Python to easily manage all supermarket-related functions by a single user. As a terminal application, the users are able to perform basic operations of their supermarket such as additional items, view items, clear items/stocks, purchase items, search for specific products in the stocks and edit any items/products placed in the system record. Supermarket Management System also facilitates users to add new products to their stocks as a sale. This function includes adding items with their name, quantity, and price of the item. Users can also see all the items stored in the system. The program shows the number of items along with their name, quantity, and price.
